Vulnerability Detection Result
`Exclusion reason:`
`Found pattern: / on URL: http://192.168.1.254var ModelName="([^"]+)"`

Solution
If you want to scan the remote host, uncheck the 'Exclude printers from scan' option within the 'Global variable settings' of the scan config in use and re-scan it.

Vulnerability Insight
Many printers react very badly to a network scan. Some of them will crash, while others will print a number of pages. This usually disrupt office work and is usually a nuisance. As a result, the scan has been disabled against this host.
